PROFILE

- I'm a student of software development at UNAD (colombia), I'm passionate about web development.
- Intermediate-advanced English level.
- basic knowledge in some programming languages like c, c# and java.
- Great teamwork and communication skills.
- I have some experience building web apps with technologies like html, CSS, JavaScript, bootstrap, git, sass and react.

PROJECTS

[Cryptosearch](#)

- Developed an app with react that uses the coingecko api to show data about cryptocurrencies and lets the user compare cryptos.

[Daily Components](#)

- This is a landing for a project I'm working on, called daily components that is going to let users copy and paste components for their websites, this app is being built using react and tailwind.
